

RESEARCH GROUP *MOLECULAR BIOLOGY* (DIEKMANN)

2009

Jung, Murzik, Wehder, Hemmerich & Melle
Regulation of cellular actin architecture by S100A10.
Exp. Cell Res. (2009) submitted

Diekmann S
Mikroskopische Techniken.
in: *Molecular Biotechnology*, Ed. M. Wink, Wiley VCH, submitted

Brand P, Lenser T, Hemmerich P
Assembly Dynamics of PML Nuclear Bodies in Living Cells
PMC Biophysics 2009, submitted

Orthaus S, Hellwig D, Erliandri I, Weber C, Jung J, Hofmeister A, Pfeifer S, Hoischen C,
Diekmann S
FRET studies of human inner kinetochore proteins.
submitted

Hemmerich P, von Mikecz A
Kinetic imaging of nanoparticle-biointeractions in living cells.
Nano Letters 2009, submitted

Altenberg B, Diekmann S, Greulich KO
There is no general human kinetochore – each tissue has its own.
submitted

Kenanov D, Kaleta C, Petzold A, Hoischen C, Diekmann S, Siddiqui R, Schuster S
Theoretical study of lipid biosynthesis in wild type *Escherichia coli* and in a protoplast-Type
L-form using elementary flux mode analysis.
in revision

Lang, Jegou, Chung, Richter, Münch, Udvarhelyi, Cremer, Hemmerich, Engelhardt, Hell &
Rippe
On the three-dimensional organization of promyelocytic leukemia nuclear bodies.
J. Cell Sci (2009) in press

Aumann F, Sühnel J, Langowski J & Diekmann S
Rigid assembly and Monte Carlo models of stable and unstable chromatin structures: the
effect of nucleosomal spacing.
Theor Chem Account 2009, DOI 10.1007/s00214-009-0561-9

Lohel M, Ibrahim B, Diekmann S & Dittrich P
The role of localisation in the operation of the mitotic spindle assembly checkpoint.
Cell Cycle 2009, 8, 1-11

Allan JE, Hoischen C & Gumpert J
Bacterial L-Forms.
Advances in Applied Microbiology 2009, 68, 1-39

Hellwig D, Hoischen C & Diekmann S

Acceptor-bleaching FRET analysis of inner kinetochore proteins in living human cells.

Eur Biophys. J 2009 Jul; 38(6), 781-91

Bussiek M, Hoischen C, Diekmann S & Bennink ML

Mechanical properties of African green monkey alpha-satellite DNA and measurements of nucleosomal stability using optical tweezers.

J struct Biol 2009, 167, 36-46

Orthaus S, Klement K, Happel N, Hoischen C & Diekmann S

Linker histone H1 is present in centromeric chromatin of living human cells next to inner kinetochore proteins.

Nucleic Acids Res. 2009 Jun; 37(10) 3391-406

Ibrahim B, Schmitt E, Dittrich P & Diekmann S

In silico study of kinetochore control, amplification and inhibition effects in MCC assembly

BioSystems 2009, 95, 35-50.

Weidtkamp-Peters S, Weisshart K, Schmiedeberg L & Hemmerich P

Fluorescence correlation spectroscopy to assess the mobility of nuclear proteins.

Methods in Molecular Biology 2009, 464, 321-341.

Murzik U, Hemmerich P, Weidtkamp-Peters S, Ulbricht T, Bussen W, Rosenhahn J, von Eggeling F & Melle C

Rad54B targeting to DNA double-strand break repair sites requires complex formation with S100A11.

Mol Biol Cell 2009, 19, 2926-2935.

2008

Weidtkamp-Peters S, Lenser T, Negorev D, Gerstner N, Hofmann TG, Schwanitz G,

Hoischen C, Maul G, Dittrich P & Hemmerich P

Dynamics of component exchange at PML nuclear bodies

J Cell Sci. 2008, 121, 2731-2743.

Hellwig D, Münch S, Orthaus S, Hoischen C, Hemmerich P & Diekmann S

Live-cell imaging reveals sustained centromere binding of CENP-T via CENP-A and CENP-B.

J Biophoton 2008, 1, 245-254.

Hemmerich P, Weidtkamp-Peters S, Hoischen C, Schmiedeberg L, Erliandri I & Diekmann S

Dynamics of inner kinetochore assembly and maintenance in living cells

J Cell Biol 2008, 180, 1101-1114.

Ibrahim B, Dittrich P, Diekmann S & Schmitt E,

Mad2 binding is not sufficient for complete Cdc20 sequestering in mitotic transition control (an *in silico* study).

Biophys Chem. 2008, 134, 93-100

Orthaus S, Biskup C, Hoffmann B, Hoischen C, Ohndorf S, Benndorf K & Diekmann S

Assembly of the inner kinetochore proteins CENP-A and CENP-B in living human cells.

ChemBioChem 2008, 9, 77-92

Ibrahim B, Diekmann S, Schmitt E & Dittrich P
In silico modeling of the Mitotic Spindle Assembly Checkpoint.

PloS One 2008, 3, e1555

Derome A, Hoischen C, Bussiek M, Grady R, Kędzierska B, Diekmann S, Barillà D & Hayes F
Centromere anatomy in the multidrug resistant pathogen *Enterococcus faecium*,
Proc Natl Acad Sci USA 2008, 105, 2151-2156

Hoischen C, Bussiek M, Langowski J & Diekmann S
Escherichia coli low-copy-number plasmid R1 centromere parC forms a U-shaped complex
with its binding protein ParR. *Nucleic Acids Res* 2008, 36, 607-615

2007

Bussiek M, Müller G, Waldeck W, Diekmann S & Langowski J
Organisation of nucleosomal arrays reconstituted with repetitive African green monkey α -
satellite DNA as analysed by atomic force microscopy. *Eur Biophys J* 2007, 37, 81-93

Gellermann GP, Ullrich K, Unger C, Fändrich M, Sauter S & Diekmann S
Identification of molecular compounds critical to Alzheimer's -like plaque
formation. *J Neurosci Res* 2007, 85, 2037-2044

Ibrahim B, Dittrich P, Diekmann S & Schmitt E
Stochastic effects in a compartmental model for mitotic checkpoint regulation.
J of Integrated Bioinformatics 2007, 10-01, IB07 article

Schickel J, Pamminger T, Ehram A, Münch S, Huang X, Klopstock T, Kurlemann G,
Hemmerich P, Dubiel W, Deufel T & Beetz C
Isoform-specific increase of spastin stability by N-terminal missense variants including
intragenic modifiers of SPG4 hereditary spastic paraplegia.
Eur J Neurol 2007, 14, 1322-1328

Zhang S, Hemmerich P & Grosse F
Centrosomal localization of DNA damage checkpoint proteins.
J Cell Biochem 2007, 101, 451-465

Zhang S, Hemmerich P & Grosse F
Werner syndrome helicase (WRN), nuclear DNA helicase II (NDH II) and histone γ -H2AX are
localized to the centrosome.
Cell Biol Int 2007, 31, 1109-1121

2006

Fändrich M, Zandomenighi G, Krebs MR, Kittler M, Buder K, Rossner A, Heinemann SH,
Dobson CM & Diekmann S
Apomyoglobin reveals a random-nucleation mechanism in amyloid protofibril
formation. *Acta Histochem* 2006, 108, 215-219

Gellermann GP, Appel TR, Davies P & Diekmann S
Paired helical filaments contain small amounts of cholesterol, phosphatidylcholine and
sphingolipids.

Biol Chem 2006, 387, 1267-1274

Orthaus S, Ohndorf S & Diekmann S

RNAi knockdown of human kinetochore protein CENP-

H. Biochem Biophys Res Commun 2006, 348, 36-46

Sachse C, Xu C, Wieligmann K, Diekmann S, Grigorieff N & Fändrich M Quaternary structure of a mature amyloid fibril from Alzheimer's A.(1-40) peptide.

J Mol Biol 2006, 362, 347-354

Schickel J, Beetz C, Frommel C, Heide G, Sasse A, Hemmerich P & Deufel T Unexpected pathogenic mechanism of a novel mutation in the coding sequence of SPG4 (spastin).

Neurology 2006, 66, 421-423

Siddiqui RA, Hoischen C, Holst O, Heinze I, Schlott B, Gumpert J, Diekmann S, Grosse F & Platzer M

The analysis of cell division and cell wall synthesis genes reveals mutationally inactivated *ftsQ* and *mraY* in a protoplast-type L-form of *Escherichia coli*.

FEMS Microbiol Lett 2006, 258, 305-311

Weidtkamp-Peters S, Rahn HP, Cardoso MC & Hemmerich P

Replication of centromeric heterochromatin in mouse fibroblasts takes place in early, middle, and late S phase.

Histochem Cell Biol 2006, 125, 91-102

Lorenz M & Diekmann S

Distance determination in protein-DNA complexes using fluorescence resonance energy transfer. In: *Methods Mol Biol*, Vol: 335 Fluorescent Energy Transfer Nucleic Acids Probes Humana Press Inc., Totowa, NJ, USA, 2006, 243-255

2005

Gellermann GP, Appel TR, Tannert A, Radestock A, Hortschansky P, Schroeckh V, Leisner C, Lütkepohl T, Shtrasburg S, Röcken C, Pras M, Linke R P, Diekmann S & Fändrich M

Raft lipids as common components of human extracellular amyloid fibrils.

Proc Natl Acad Sci USA 2005, 102, 6297-6302

Mischo HE, Hemmerich P, Grosse F & Zhang S

Actinomycin D induces histone γ -H2AX foci and complex formation of γ -H2AX with Ku70 and nuclear DNA helicase II.

J Biol Chem 2005, 280, 9586-9594

von Langen J, Fritzemeier KH, Diekmann S & Hillisch A

Molecular basis of the interaction specificity between the human glucocorticoid receptor and its endogenous steroid ligand cortisol.

ChemBioChem 2005, 6, 1110-1118

Von Mikecz A & Hemmerich P

Subnuclear pathology.

In: *Visions of the Cell Nucleus* (eds. Hemmerich P & Diekmann S)

American Scientific Publishers, Stevenson Ranch, CA, USA, 2005, 184 - 203

Hemmerich P & Diekmann S (eds.)

Visions of the Cell Nucleus

American Scientific Publishers, Stevenson Ranch, CA, USA, 2005
